About Versiv

Versiv was created with the goal of being the industry leading provider of innovative sustainable solutions for the natural gas industry. With over five decades of industry experience, our leadership team has an in-depth understanding of pipeline operations and the commitment to reducing emissions. Today, Versiv's primary focus is on providing cross compression services as an alternative to venting, flaring, or blowdown during pipeline repairs and installation.

Versiv is a nationwide provider – leveraging the Artera footprint across 41 states and 130+ locations enables rapid response while minimizing mobilization costs. Learn more about Versiv and its solutions at www.versivsolutions.com.

Understanding Cross Compression

1. Connection to system in need of evacuation
2. Connection to receiving system
3. Cross compress volume into receiving system
4. Disconnect from each system

Specifications

- Operating Pressure: up to 1480 PSI
- Pipeline Size: 2" – 42"
- Automatic Safety Shut-off
- All equipment certified for use in natural gas
- Low decibel equipment
